Profile

Creative and detail-driven Frontend Engineer with 1+ years of experience crafting sleek, responsive web apps using React, Vue.js, Tailwind CSS, JavaScript, and Node.js. Passionate about building smooth user experiences and bringing ideas to life through clean, efficient code.

Professional Experience

11/2024 – present
Nairobi, Kenya

Frontend Developer

Good Kenyan [🔗](#)

- Developed and maintained responsive web interfaces using React and Tailwind CSS, improving user engagement by 30%.
- Collaborated with backend teams to integrate RESTful APIs and enhance data-driven features.
- Implemented reusable components and optimized performance, reducing load times by 25%.
- Worked in an Agile environment, participating in daily standups, sprint planning, and code reviews.

06/2024 – 09/2024
Nairobi, Kenya

Junior Frontend Developer

Twiga Foods [🔗](#)

- Assisted in building dynamic single-page applications using Vue.js and JavaScript, focusing on clean, maintainable code.
- Translated Figma designs into fully functional components with pixel-perfect accuracy.
- Applied responsive design techniques and cross-browser compatibility testing to ensure consistent UI across devices.
- Contributed to version control using Git and collaborated closely with designers and senior developers.

Skills

Python Django	● ● ● ● ●	Next.js/ Nuxt.js	● ● ● ● ●
Jest, React Testing Library	● ● ● ● ●	Git & Github	● ● ● ● ●
Typescript	● ● ● ● ●	Tailwind CSS	● ● ● ● ●

Education

Certificate in Software Engineering

Moringa School [🔗](#)

Relevant coursework: Web Development, Data Structures & Algorithms, Software Engineering, Human-Computer Interaction.

Final year project: Developed a responsive web-based inventory management system using React and Python Django

Projects

GlamGlow – Beauty Shop Website

GlamGlow is a responsive web application for a beauty shop that allows users to browse skincare and cosmetic products, book services online, and contact the shop. The platform includes an admin dashboard for managing products, appointments, and customer messages. It was built using React for the frontend and Django for the backend, with RESTful APIs handling data interactions.

Swift Card

SwiftCard is a full-featured e-commerce web application that enables users to browse products, manage their cart, and complete purchases. It includes user authentication, product search and filtering, and order tracking. The application was built using React for the frontend and Firebase for backend services, including authentication, database, and hosting.
